RECYCLED POLYESTER FROM PLASTIC MARINE LITTER

remade in portugal

On the road to a sustainable future, UNTD has developed a new fabric made from recycled polyester, to be used in its future product lines. The **NEO material**, is a new and extremely soft and light material, that gives a great touch and feel. The Seaqual Yarn, which is made up of 100 percent post-consumer recycled polyester thread, 10 percent upcycled marine plastic, and 90 percent post-consumer PET from land sources, is used in the NEO fabric, that is the base of the Spring 2023 UNTD industries collection. The **SEAQUAL INITIATIVE** is a community of individuals, organizations and companies working together to help clean our oceans, raise awareness of the issue of marine litter and highlight those helping to fight it, and works with ocean clean-ups around the world to bring value to the waste that they recover.
